EPINEPHRINE • NALOXONE • ALBUTEROL • GLUCAGON • SEVERE BLEEDING KITS AND MORE **Made in U.S.A.** 

WHY ARE SCHOOL NURSES AND HEALTH DEPARTMENTS FALLING IN LOVE WITH THESE LIVESAFER CABINETS?

- They put lifesaving supplies in public corridors - instead of locked away in the nurse's office
- They're conspicuously labeled for easy understanding
- They're flexible, changeable and upgradeable - just peel off a label and apply a new one.
- They don't put undue emphasis on Naloxone. You don't want parents walking past a cabinet and saying "Wow, they must have bad drug problems in this school" - by blending everything into a kit, it is more subtle even though its incredibly comprehensive.

FOR MOUNTING NEXT TO YOUR EXISTING AED

- #EN9693 Cabinet holds AED and Single Bleeding Control Kit (Inner Case Included)
- #EN9692 Cabinet holds AED and 2 Loose Auto Injectors and 2 Loose Naloxone Doses

Includes 3D Sign

This wall-mounted cabinet is intended to be installed in the school lunch room or in corridors close to eating areas (in case of food allergies) and exit doors (in case of bee stings). Whether locked or not, the patent-pending design allows for easy access to the emergency supplies inside. The Velcro back panel allows you to organize any combination of epinephrine auto injectors, asthma inhalers or other emergency supplies as appropriate for the age and allergy/asthma risks in your building. Signage options allow you to clearly indicate kit contents. Kit includes installation anchors, 3D signage to mount above the cabinet and all needed Velcro. An optional vandalism alarm is available for the unit.

AEK LABELING SYSTEM

Know who medication belongs to at a glance! Our epinephrine cabinets and storage panels are intended for high density storage of auto injectors and inhalers but to do so it is important to have the right labels. Our kit includes perfectly sized clear sleeves, plus a free label printing app and Word template on our website so you can print labels just like in our product photos.
