

WHY ARE SCHOOL NURSES AND HEALTH DEPARTMENTS FALLING IN LOVE WITH THESE LIVESAFER CABINETS?

- They put lifesaving supplies in public corridors - instead of locked away in the nurse's office
- They're conspicuously labeled for easy understanding
- They're flexible, changeable and upgradeable - just peel off a label and apply a new one.
- They don't put undue emphasis on Naloxone. You don't want parents walking past a cabinet and saying "Wow, they must have bad drug problems in this school" - by blending everything into a kit, it is more subtle even though its incredibly comprehensive.
