The ActiveSaver Severe Bleeding Control Kit: Severe Bleeding Kit 3 (3 Empty Cases)

The ActiveSaver Severe Bleeding Control Kit includes just the cabinet and cases. You put your own bleeding control kits inside. (Sold Empty)

When you analyze the reports of school shootings, it becomes obvious that a single severe bleeding kit in your AED cabinet is not going to be adequate in an active shooter situation. That's why we've created this ActiveSaver cabinet for mass casualties which allows you to keep your bleeding control kits in a conspicuous and secure storage solution.

The ActiveSaver cabinet offers the best approach to storing and deploying kits in an emergency because our cabinet keeps individual cases with severe bleeding control kits that are easy to grab and relocate to the point of need. Includes 3 empty red cases, each large enough to hold 2 tourniquets and 4 chest seals along with gauze, scissors, and a marker. Build your kits as you desire.

*Cases and Cabinet Only. Does not contain bleed kits.

PRODUCT FEATURES:

- This cabinet concept empowers you to "grab and go" to the point of need - no carrying handfuls of stuff or making multiple trips for something forgotten
- Velcro loop back panel allows you to position cases for maximum visibility and use of space
- Secure yet easily removable design
- Easy to replace medical supplies after used in an emergency
- Cabinet includes mounting hardware, thumb turn knob, and 3D Wall Sign.
