

The LiveSafer 5 Safety Station

LiveSafer Cabinets are growing in popularity every year with schools more focused than ever on public access emergency supplies for allergic reactions, severe bleeding, asthma attacks and overdose. The new LiveSafer 5 Safety Station™ includes a sturdy white cabinet, alarm, 5 red inner cases, and a variety pack of included labels for common emergencies.

Place this cabinet next to your existing AED cabinet for up to 5 different emergencies - or if you do not have an AED cabinet you can use the included AED bracket hook for storage of an AED. It's configurable and it's your choice! Comes with a 3D projecting sign and mounting hardware.

**No Medication Included - We Sell Empty Cases/Cabinets and You Obtain Your Own Medication*

PRODUCT FEATURES:

- Store each life saving device or medication separately with its own laminated instruction sheet
- If you do not need all the inner cases yet you can consider making one case a general first aid supply kit with bandaids, neosporin, gauze -- this is often lacking in public spaces!
- The system utilizes our industry-leading Velcro loop back panel and Velcro-brand fasteners to ensure the cabinet works great and looks great regardless of configuration
- A critical part of our strategy is keeping supplies/devices for each incident type separate - because they are not generally needed simultaneously
- This cabinet concept empowers you to "grab and go" to the point of need - no carrying handfuls of stuff or making multiple trips for something forgotten
- We make a large, laminated instruction sheet for each emergency type
- We recommend keeping General First Aid Supplies in your cabinet too - they're often missing from public areas in large facilities!
- Cabinet includes mounting hardware, thumb turn knob, instruction sheets

Width: 15 in
